Subject	Establishing Morse Code as an Intangible Heritage		
Society	DARC	Country:	Germany
Committee:	C3	Paper number:	SC11_C3_32
Author:	Joerg Jaehrig, DJ3HW		

Introduction

Morse code was a real milestone in the development of wireless communications technology. Morse code as a kind of language especially in amateur radio has overcome barriers of language. Because of this Morse code contributed to international understanding. This artificial language with all its abbreviations has still been alive in amateur radio despite of all the modern transmission modes.

Key points and proposal

Becoming an Intangible Heritage would be an adequate honour for Morse code and could gain the popularity even in our modern times.

Recommendation

It is recommended to start an initiative within IARU Region 1 tasking IARU to ask UNESCO for establishing Morse code as an Intangible Heritage.
